R v.1 March-August 1894

CONTENTS.

	PAGE
Physical Science and its Connections,	1
On the New Theory of Solutions,	12
On Insular Floras,	27
Fossil Plants,	42
On the Origin and Nature of Certain Bacterial Poisons,	64
On the Present Outlook of Vertebrate Morphology,	73
On Chemical Physiology,	91
Epigenesis or Evolution,	105
On our Present Knowledge of the Numerical Value of the Mechanical Equivalent of Heat,	127
Researches on Proteid Metabolism,	141
The Evolution of Igneous Rocks,	152
Vermes, Cœlenterata and Protozoa,	166
On the Study of Adaptation in Plants,	176
The Determination of the Available Plant Food in Soils,	193
The Embryology of the Porifera,	208
Some Aspects of the Immunity Question,	234
Experiment in Mineralogy,	249
Algæ,	261
Jottings from Recent Neurological Progress,	272
Pure Yeast and its Relations to Brewing Operations,	289
Electrosynthesis,	301
Glycogen,	311
Mesozoic and Kainozoic Geology in Europe,	320
The Localisation of Enzymes in Plants,	342
Recent Additions to our Knowledge of the Ancient Sediments,	356
Ionic Velocities,	373
Insular Floras (ii.),	387
On the New Theory of Solutions (ii.),	405
Italian Anthropometry,	420
